Keeping you safe and secure

CCTV SYSTEM

CCTV system plays an important role in the administration and security management of a facility, by being able to monitor and record all the activities within. The choice of system and cameras determines the efficacy of the system.

OS SYSTEMS strength not only lies in offering complete range of CCTV related products and accessories, but also in designing the most cost-effective solution for a given situation our designs take care of the location, height, illumination, tampering and many parameters that define the success for CCTV.

ACCESS CONTROL

With full monitoring of points of access and perimeters, the system ensures control of access to the plant or building with the appropriate levels of security.

OS SYSTEMS offers both online and offline access control systems. Our experienced professional and aggressive technical staff is ready to build the security awareness and demand for its variety of products designed to suit environments ranging from retail warehousing plants to up multi-store building.

Our products range from single door controller to an integrated Alarm/Access/CCTV system comprise of biometrics, RFID, Card access, server/cloud-based solution.

BURGLARY ALARM

All types of premises can be protected by installing a Burglary Alarm system. With a wealth of experience in the Security Industry we have installations ranging across every type of premises, residential, retail outlets, warehouses, offices, commercial institutions. Whatever type of premises you require security for, we can provide.

BMS

Building Management and Automation Systems (BMS) are centralized, interlinked, networks of hardware and software, which monitor and control the environment in commercial, industrial, and institutional facilities.

While control of mechanical, electrical, plumbing such as but not limited to HVAC, heating, ventilation, water leakage prevention etc. building systems, OS SYSTEMS automation ensures the operational performance of the facility, the comfort and safety of building occupants as well as lighting control for optimizing building performance.

INFRASTRUCTURE

There's more to OS Systems consultants than pulling cables. We offer a diverse range of cabling infrastructure systems. Our cabling team will work with you to evaluate various types of integrated systems.

The ability to converge voice, data, and video makes OS Systems your single-source provider for all your security and IT infrastructure needs.

Structured cabling systems are the foundation of a modern information network. Our goal is to provide you with a cabling system that's flexible enough to permit changes and upgrades without disrupting your productivity.
